## Welcome to HCL Domino 12.0.1 Beta 2

The goal of the HCL Domino 12.01 Beta Program is for the community of beta participants to conduct an honest, constructive and thoughtful review and testing of the Domino 12.0.1 beta software. Beta 2 includes the following components:

- Domino on Docker
- Domino for Windows, Linux, AIX, IBM i
- HCL Enterprise Integrator
- Traveler for Windows, Linux, AIX (Multilingual), IBM i
- Notes Standard for Windows
- Notes Standard for Mac
- Notes, Designer, and Admin Client
- HCL Traveler for Microsoft Outlook (HTMO) 3.0.3

**Note:** Beta 2 will be made available in Group 1 and Group 2 languages at a later date.

## What's new?

The Beta documentation is published on the HCL documentation site. To get started, see the documentation on the new features.

**Note:** You may need to refresh your browser to see the documentation.

- **Domino documentation:**  
[What's new in Domino 12.0.1 beta 2?](#)
- **Notes documentation:**  
[What's new in Notes 12.0.1 beta 2?](#)
- **Domino Designer documentation:**  
[What's new in Domino Designer 12.0.1?](#)
- **Traveler documentation:**  
[What's new in Traveler 12.0.1?](#)
- **Traveler for Microsoft Outlook documentation**  
[What's new for Microsoft Outlook support?](#)
- **HCL Enterprise Integrator documentation**  
For HEI what's new information, see the [HCL Enterprise Integrator 12.0.1 Release Notes](#)

## Beta Forum

As always, your input and feedback are crucial to us. Let us know what you think about the product and new features by submitting your feedback in our [Domino 12 Beta forum](#). If you participated in a previous Domino beta, you can continue to use that account and no sign-up is required. Otherwise, you can create an account when prompted to authenticate. Please note that creating a new account may take some time as new accounts need to be validated.

## System requirements

System requirements are available on the HCL Software Support site:

- [Domino 12.0.1 system requirements](#)
- [Domino 12.0.1 for IBM i software requirements](#)
- [Notes 12.0.1 system requirements](#)
- [iNotes 12.0.1 browser requirements](#)
- Traveler supports the same operating system versions as Domino 12.0.1. For overall Traveler 12.x requirements, see [System requirements for Traveler 12.0.x](#).
- [Traveler for Microsoft Outlook 3.0.3 system requirements](#)
- For HEI what's system requirements, see the [HCL Enterprise Integrator 12.0.1 Release Notes](#)

**Note:** A preview of a 64-bit Domino Designer client and Notes standard client for Windows is provided for Beta 2 through a separate installer. We encourage you to test integrating your extensions to this 64-bit client. This client is provided as a preview for testing and is planned for a release subsequent to 12.0.1.

## Fix list

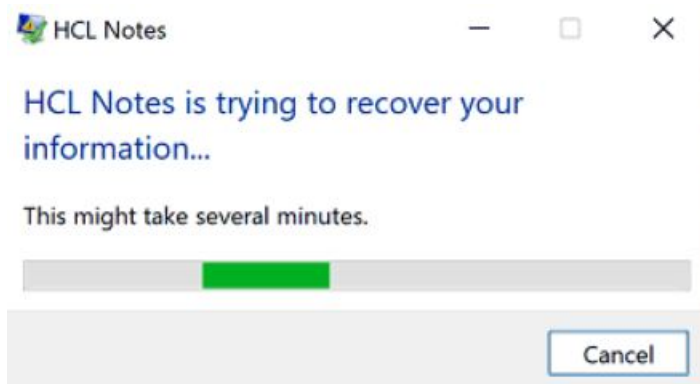

See the complete fix list for Notes and Domino 12.0.1 [here](#).

## Domino known issues

- Having an empty `dbmt_compact_filter.ind` causes DBMT to skip compacting all databases. The `dbmt_compact_filter.ind` must have at least 1 entry; this entry can be a dummy name. SPR # JPAIC7DJBL
- If no `.ind` file is specified by `-blacklist`, DBMT skips compacting all databases. The `.ind` file for `-blacklist` must be specified and must have at least 1 entry; this entry can be a dummy name. SPR # DNADC6YQ7A

## Notes known issues

- Selecting **Document > Open in New Window** does not open a new window, and fails to load the view and content. After exiting the view, users see the following message:

SPR # AYAVC7AFJL

- Unread count outline goes out of the selection rectangle for some cases in Workspace. SPR # SBOEC7B9VN
- Removal of 3 dots and make replica icon clickable. SPR # SBOEC79GN9

### Traveler known issues

- Traveler Server and client support for mail routing between Domino and domains with Internationalized Domain Names (IDNs) may not work as expected in this beta delivery. This will be resolved in the final version of Traveler 12.0.1 and/or as needed in the HCL Verse mobile and HCL Traveler for Microsoft Office clients. SPR # BRISC75KWJ

### Designer known issues

- LotusScript editor highlights selected text incorrectly. SPR # RGANC6VJ9W
- Expanding Reference - Lotusscript language causes a crash (HCL Notes Error Notification). This is only an issue in V1201 64 bit. SPR # RGANC7DFW3

### HEI known issues

- Virtual document and Virtual agents may not work as expected on Domino 12.0.1. This will be fixed in final version of Domino 12.0.1 SPR # SKRYC62DYT

### iNotes known issues

- Deleting internet certificate from iNotes security preferences produces a crash for any user with vaulted ID. The following steps reproduce this crash:
  1. Log in to iNotes.
  2. Select **Preferences > Security > NotesId Info**.
  3. Delete an internet certificate.
  4. Close the popup.
  5. In Security, click on **NotesID Info**. The crash occurs.SPR # RSRAC66EWC

## Additional Notes

- ~~• The Zoom application is awaiting approval for the new Dynamic Meeting Integration Notes feature. It's expected to be approved soon, but until then the Zoom integration with Notes 12.0.1 Beta does not work.~~—Aug 26, 2021: Zoom application is approved and working.
- To see the new 64 x 64 pixel icons in the workspace for the following applications, apply the new template to them: Mail, Personal Address Book, Bookmarks, Notebook, Teamroom, Discussion, Resource Reservations, Domino Directory.
- The help installed with Notes and Domino is not yet updated for Release 12.0.1.
