What's new in HCL Sametime® 11

New modern look

HCL Sametime 11 has a simplified, user-oriented look, with a new cleaner, modernized color scheme and design.

64-bit port Community Server

HCL Sametime 11 now offers both Windows and Linux 64-bit community server.

Simplified install for Sametime Proxy

The Sametime Proxy server install now comes bundled with Tomcat, simplifying the deployment.

Click to meet

Click to meet lets you start a meeting through a Third-party conferencing application from the chat conversation. The Launch Meeting and Send Invitation option appears as a button on the chat conversation window. When you, click the button, a pop-up window displays, to configure the External Meeting Provider. Enter the meeting provider link in the Meeting URL text box.

New modern look for Web Chat client

There is External Conference Integration in both web chat client and rich client.

The Web chat client provides style and design improvements.

New Web Chat client feature enhancements

Users can send and receive attachments with online users.

Users can send pasted images to online users.

System requirements
